

Direct Energy Weapons Agency

The New Frontier

About

Direct Energy Weapons Agency works to improve protection, safety and security. The agency's work includes education, research, testing, treatment and rehabilitation.

A directed-energy weapon (DEW) is a ranged weapon that damages its target with highly focused energy, including laser, microwaves and particle beams. Potential applications of this technology include weapons that target personnel, missiles, vehicles, and optical devices.

They are also defined as electromagnetic systems capable of converting chemical or electrical energy to radiated energy and focusing it on a target, resulting in physical damage that degrades, neutralizes, defeats, or destroys an adversarial capability.

Critical and Emerging technologies, released Tuesday by the National Security Council and the National Science and Technology Council's Fast Track Action Subcommittee on Critical and Emerging Technologies. It's a resource to "promote U.S. technological leadership" and for cooperation with international allies. *Hypersonic capabilities, *directed energy, *renewable energy generation and storage, *nuclear energy and *financial technology.

QUOTES

New weapons
require new tactics,
Never put new wine
in old bottles.

Heinz Guderian

The individual is
handicapped by
coming face to face
with a conspiracy so
monstrous he cannot
believe it exists.

Edgar Hoover

Whether you think
you can or
you think you can't,
you're right.

Henry Ford
